Tired?

Nervous?

Angry?

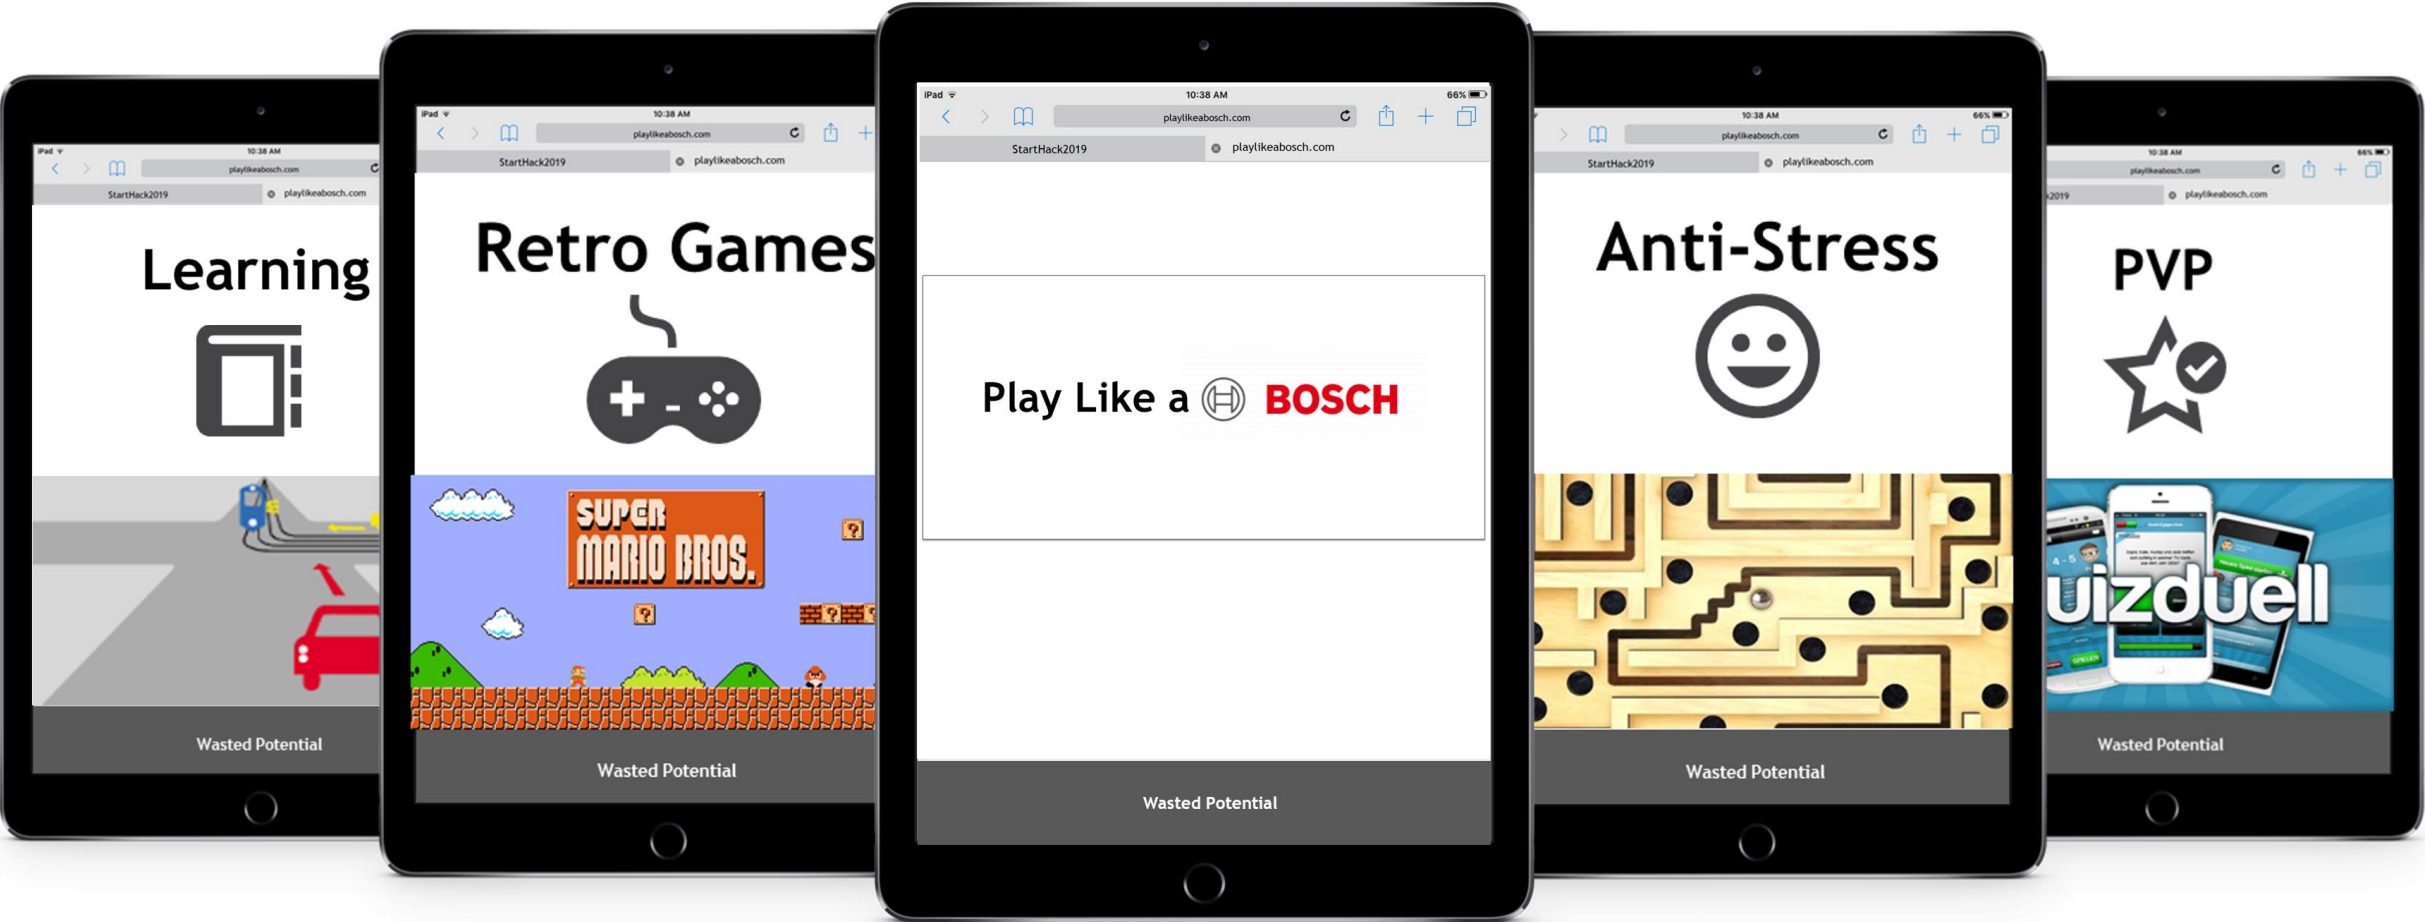

Stressed?

Anxious?

Bored?

Having any of these symptoms while driving a car may have serious consequences on your own health and on the well-being of others!

Entertainment System

Education System

Therapy System

84'000 student drivers
in 2017 in Switzerland
alone¹

Learning Students

80 Mio. digital
natives in the U.S.
alone²

Digital Natives

Every 5th person on
the road right now is
close to or over the
age of 65 (US, DACH)³

Silver Drivers

At least 1 Mio. drivers
in Germany suffer
from driving-induced
traumata or anxiety⁴

Burdened People

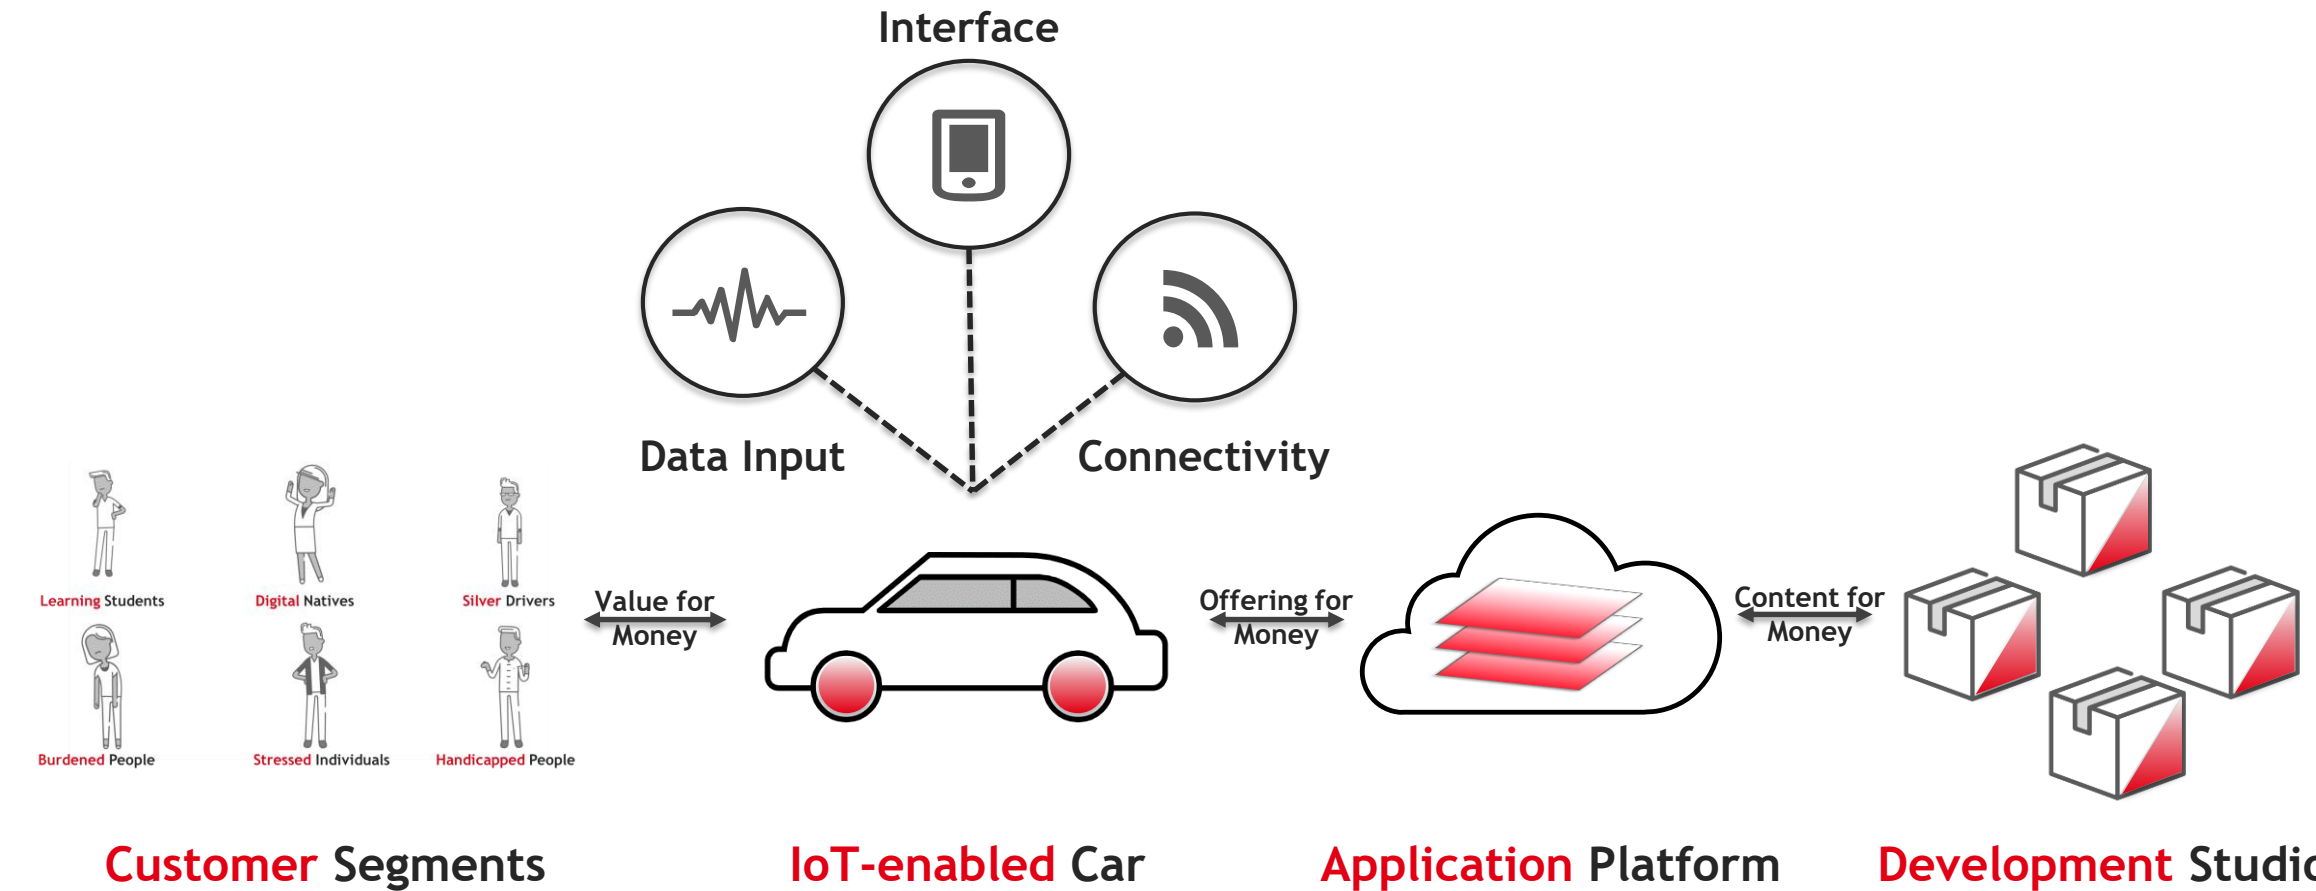

Over 60% of drivers
in the US and Europe
are regularly stressed
during peak driving
hours⁵

Stressed Individuals

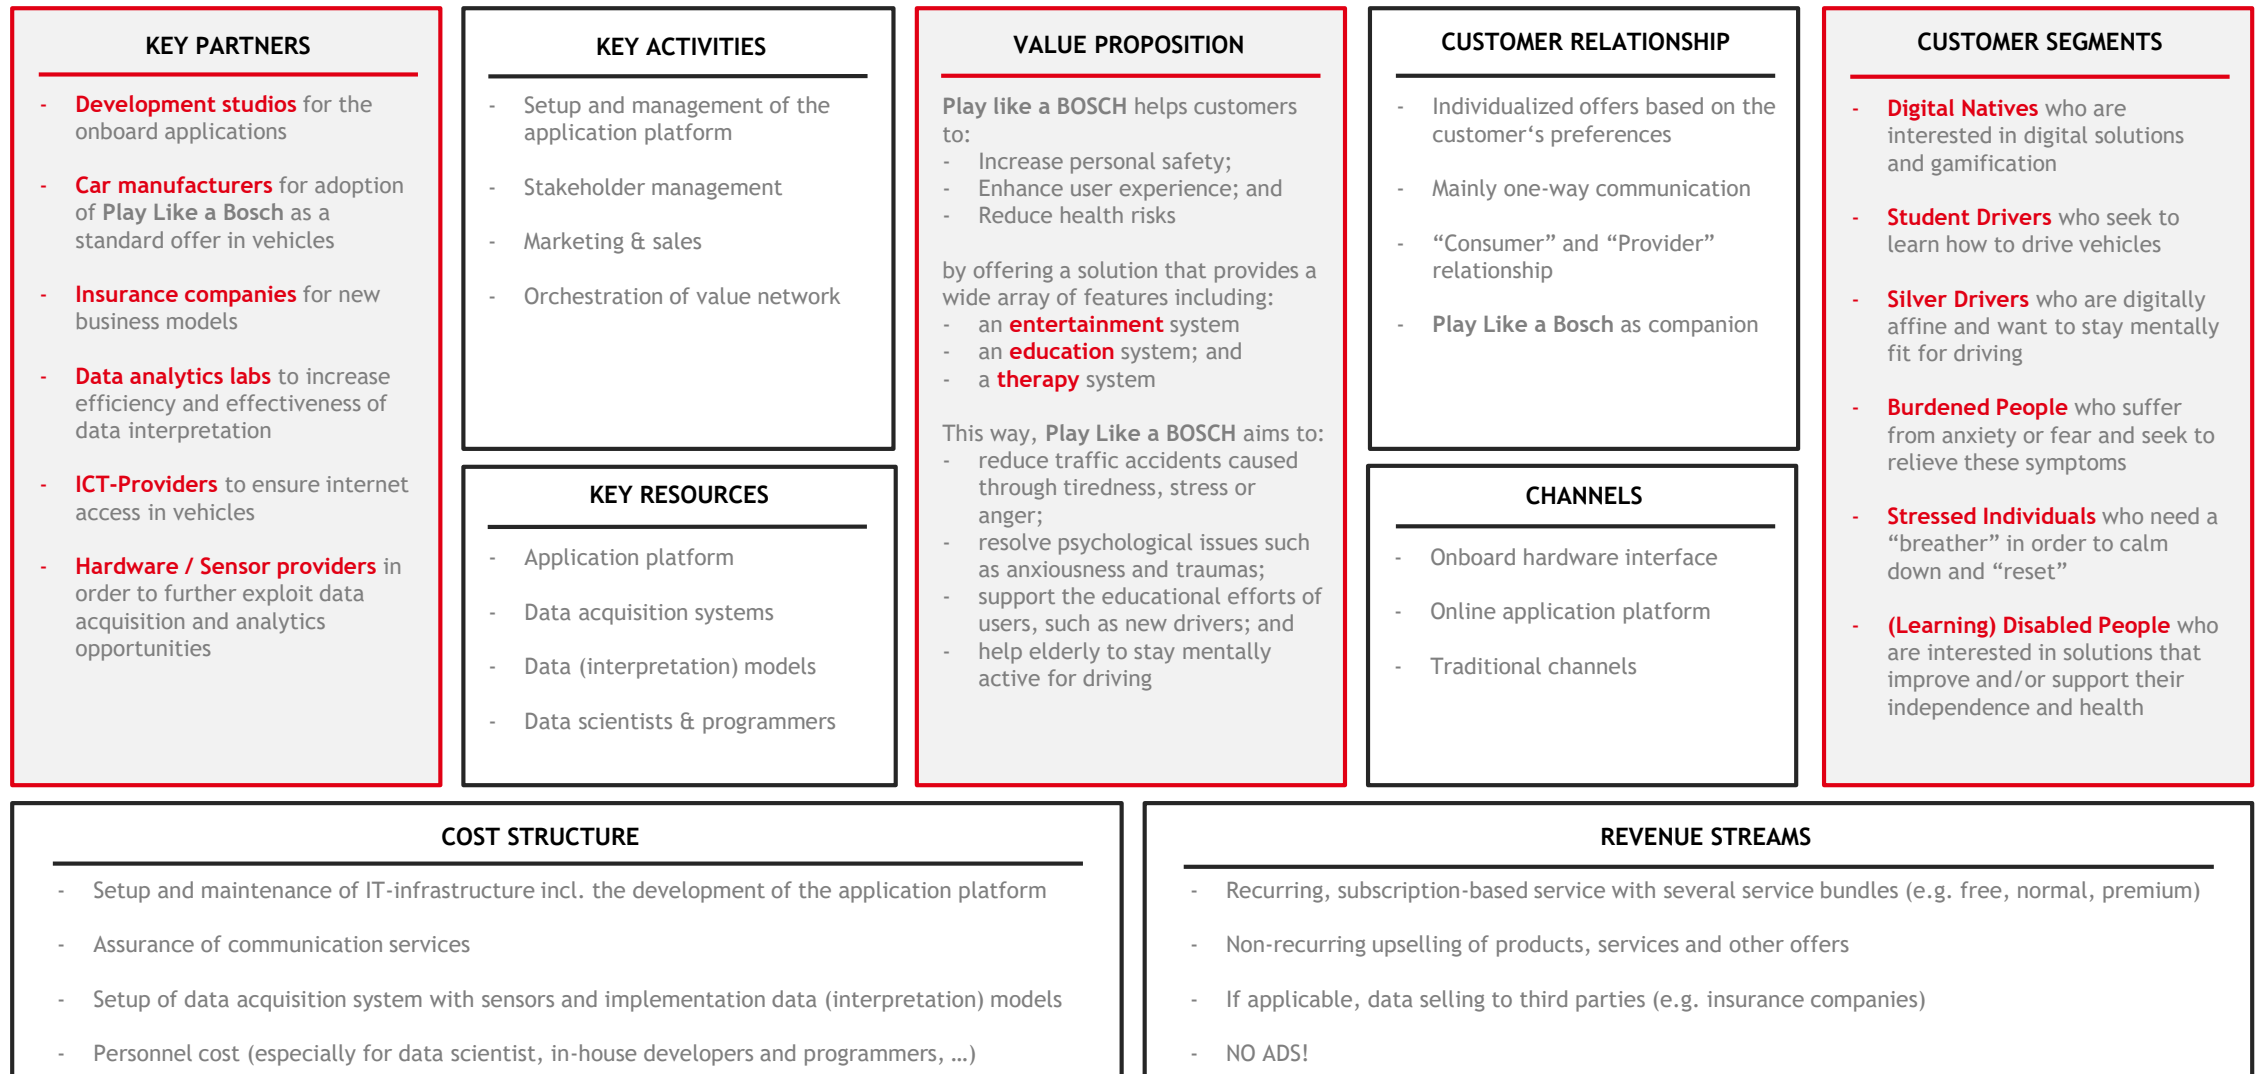

Approx. 850'000
drivers in Germany are
handicapped, profiting
from new technologies
allowing them to drive⁶

Handicapped People

Using the IoT-enabled car as an immersive controller, the platform allows the distribution and streaming of entertainment, education and therapy applications.

IoT-enabled Car

Development of more
precise data models

3D-Experience

Introduction of
autonomous Driving

5G Connectivity

Increased speed and
capacity for data exchange

Reduced latency for real-
time data streaming

Lower battery consumption
predicted

Application Platform

Modular architecture for
easy-to-access applications

Establishment of digital
offering toolbox

Intelligence from cloud
moves to edge devices
